Index Description

ProfitScore's Regime-Adaptive Long /Short Equity (PSRAE) is a highly liquid, systematic index trading S&P 500 Index securities. Depending on the market state - Low Vol or High Vol - trading decisions are driven by two different trading constructs. During Low Vol, the system is designed to identify and dynamically capture gains based on persistent directional moves. As volatility increases, markets often become increasingly unstable and inefficient. During these High Vol states, trade length shortens as the program quickly adjusts exposures to capitalize on market inefficiencies. This program's most significant value generally occurs during periods of high volatility and market stress when many other strategies are faced with performance challenges.

For more information on PSRAEand Profitscore's other indicies, please visit www.ProfitScoreIndex.com

Key Features

- Highly liquid, transparent investments
- Tactical models to minimize systematic risk
- Multiple constructs to adapt to specific market states
- Long and short positions
